Roundtable on Sustainable Palm Oil

## ***RSPO commends the establishment of the Belgian Alliance on Sustainable Palm oil***

*“The establishment of the Belgian Alliance on Sustainable Palm Oil is a highly commendable and progressive initiative undertaken by organizations towards 100% sourcing of Certified Sustainable Palm Oil (CSPO) by 2015. The Belgian Alliance demonstrates strong commitment and leadership in promoting sustainability among European product manufacturers, continuing the positive trend initiated by the Dutch national industry commitment in 2010. It is an exemplary endeavour which we hope more European consumer markets can typify and commit themselves in order increase the uptake of CSPO. Today RSPO CSPO represents 11% of all palm oil produced globally. To this end, RSPO looks forward to working closely with the Belgian Alliance on Sustainable Palm Oil and its members to raise consumer awareness of sustainable palm oil.”* Darrel Weber, Secretary General of RSPO.

### **About RSPO**

In response to the urgent and pressing global call for sustainably produced palm oil, the Roundtable on Sustainable Palm Oil (RSPO) was formed in 2004 with the objective of promoting the growth and use of sustainable oil palm products through credible global standards and engagement of stakeholders. The seat of the association is in Zurich, Switzerland, while the secretariat is currently based in Kuala Lumpur with a satellite office in Jakarta.

RSPO is a not-for-profit association that unites stakeholders from seven sectors of the palm oil industry - oil palm producers, palm oil processors or traders, consumer goods manufacturers, retailers, banks and investors, environmental or nature conservation NGOs and social or developmental NGOs - to develop and implement global standards for sustainable palm oil.

Such multi-stakeholder representation is mirrored in the governance structure of RSPO such that seats in the Executive Board and project level Working Groups are fairly allocated to each sector. In this way, RSPO lives out the philosophy of the "roundtable" by giving equal rights to each stakeholder group to bring group-specific agendas to the roundtable, facilitating traditionally adversarial stakeholders and business competitors to work together towards a common objective and making decisions by consensus.
